

Adron Systems introduces the Vx Acquisition System™ for your older Finnigan ion trap and quadrupole mass spectrometers:

"Vx is easy to use and very reliable. Controlling your GC/MS system can be as easy as using a CD player. This versatile program allows you to control your GC/MS and autosampler with one program. Files can be automatically converted to ChemStation for quantitation and library searches. The reliability of this program has allowed us to optimize our productivity. We have been using it for a few months now, and haven't lost a single run due to a software issue. I highly recommend Vx for acquiring GC/MS data."

Tuning and calibration from the Vx Acquisition System™.

The Vx Acquisition System™ for your older Finnigan ion trap and quadrupole mass spectrometers:

Flexible

- Designed for Windows 2000 and Windows XP.
- Unified “browser” interface for fast task selection.
- Integrates with Hewlett-Packard and Agilent ChemStation™.
- Supports Finnigan ITS40/Magnum/Tracker and Varian Saturn I ion traps.
- Software control of the Varian 3400 chromatograph and Leap CTC A200S autosampler.
- Easy to install, easy to configure, and best-of-all, easy to operate.
- Functional demo version available on our website.

Easy to Use

Boost your lab's productivity with this state-of-the-art acquisition system!

Coming soon - Incos 50 / 500 / XL Support:

- \* Adron Systems is adding Vx support for these and other Finnigan instruments. Contact Adron Systems for details. **Vx is the upgrade for Vector/2 and EnviroLink systems!**

Adron Systems, the Company:

- \* Focused on providing GC/MS and LC/MS solutions for research and production laboratories.
- \* Continues to support and enhance the Vector/2 and EnviroLink line of data systems. Vector/2 and EnviroLink were originally from by ProLab Resources Inc (Madison, WI) and Teknivent Corporation (St. Louis, MO).
